Dear Esteemed Colleague,

I am thrilled to share some groundbreaking news from The Turkish Journal of Vascular Surgery, a premier international open-access journal dedicated to vascular surgeons. Our mission is to advance the diagnosis, medical, endovascular, and surgical treatments of arterial, venous, and lymphatic diseases. By publishing cutting-edge articles focused on the investigation, management, and prevention of peripheral arterial, venous, and lymphatic diseases, as well as vascular access, trauma, and malformations, we strive to enhance the management of patients with vascular disorders globally.

In an exciting development, our journal has been accepted into the prestigious Scopus index as of October 2023. This inclusion not only validates the high quality of our publications but also significantly enhances their visibility and impact in the scientific community. Moreover, articles published in 2022 and 2023 have also been indexed, ensuring that recent research contributions are readily accessible to a wider audience.

Adding to this achievement, The Turkish Journal of Vascular Surgery was accepted into the Directory of Open Access Journals

(DOAJ) in June 2024. This significant milestone underscores our dedication to providing unrestricted access to high-quality research and supporting the dissemination of knowledge within the vascular surgery field.

These accomplishments mark a significant step forward in our journey to becoming the leading resource for vascular surgeons worldwide. Our inclusion in these prestigious indices not only recognizes the excellence of our contributors but also positions our journal at the forefront of vascular surgery research.

We are immensely proud of these achievements and believe they will serve to further elevate the standing and influence of our journal. As we continue to evolve, we remain dedicated to supporting the vascular surgery community with the latest research, developments, and discussions in the field.

Thank you for your unwavering support and valuable contributions to The Turkish Journal of Vascular Surgery. We eagerly anticipate your future submissions and collaborations, as together, we advance the frontier of vascular surgery.

Warm regards,

CITATION
